Highlights

Aluminum housing

The headphone's housing is crafted from sturdy aluminum, which prevents vibration for the purest sound performance. In addition, it protects the earphones from the wear and tear of everyday use.

Anti-tangle slider

The smart anti-tangle slider helps you easily keep the two earpiece cables neatly together, simply by gliding it up. No more hassles with tangles or knots!

Durable Flexi-grip connection

This soft yet durable and flexible connector between the earphone and cable helps protect against potential damage from repeated bending.

Finely tuned neodymium driver

Neodymium is the ideal material that produces strong magnetic field for greater sensitivity in a voice coil, better bass response and higher overall sound quality. It features re-engineered 8.6mm neodymium drivers that are responsive to high frequencies and ensure pure sound clarity.

Oval sound tubes

Your in-ear headphones are precisely designed to fit any ear. Its ergonomic oval sound tube and curved architecture ensure an optimized, secure and comfortable fit – always.

Silicon caps in three sizes

Your in-ear headphones come with a choice of 3 ear caps – from small to large – so you can select the perfect fit for your ears.
